

Critical Information Summary

nbn™ Sky Muster™ Education Port Plans

Information About the Service

nbn Sky Muster™ Education Port is a service that has been made available that give families with children who are studying primary and secondary education and use the internet as their principal means of education. The Education Port will allow those children to have access to data plans that will not be impacted by the family's normal data allowance. The Education Port provides two (2) speed tiers with Peak Information Rate up to 12/1 and 25/5Mbps depending on the plan chosen

Mandatory Requirements and Availability

You will require a current application or an active Sky Muster™ satellite service with Ant. You will also need to supply Ant with your child's Student ID from your State or Territory Education Department for submission and approval by nbn™ and your local State Education Authority, before we can activate an Education Port. If your premises are in the Sky Muster™ area, the installation a satellite dish and cabling will be provided by nbn™. A pair of cables will be run from the dish and the installer will then drill a small hole through your wall and feed the cable through into a wall plate that will be installed inside the house. A cable runs from there to the Network Termination Device, which is a satellite broadband modem.

Minimum Term

Casual Connection One month

6 Months In Advance 6 months

Inclusion, exclusions and important conditions, limitations, restrictions or qualifications.

nbn™ subsidises the installation which includes : Satellite dish, Wall Outlet, Network Terminating Device (NTD) and Power Supply Unit; external cabling from the dish and internal cabling up to the Network Termination Device. This equipment remains the property of nbn and is serviced and maintained by nbn. nbn's boundary of responsibility stops at the data (UNI-D) . The removal/moving of the dish is strictly prohibited and can only be carried out by arrangement with an nbn™ installer.

The Network Terminating Device provides one Ethernet connection per subscribed internet service. If you wish to have Wi-Fi coverage to share the internet connection around the premises you will require an nbn™ ready Wireless Router.

To gain the full benefit of the nbn™ satellite speeds you should have an nbn™ ready router. ANT Communications can supply you with the nbn ready router for an additional cost of \$129.00 including postage or, you can provide your own nbn™ ready router.

nbn™ Educational Ports have an allowance of 50GB per approved student with a maximum of 3 students or a total of 150GB data that can be used Anytime and must only be used by the approved student only for their educational studies. There is no Peak or Off Peak for the educational ports. If you use all of your allocated data allowance your speed will be shaped to 128/128kbps. To connect more than one student you will require a dedicated wireless router. ANT Communications can supply you with the nbn™ ready router for an additional cost of \$129.00 including postage or, you can provide your own nbn™ ready router.

Plans are based on the peak speed of your chosen plan. Speed for customers will be dependent on location, signal strength, volume of traffic through the network, your equipment, software and download source.

Data usage is counted in both directions so if you download 10GB of data and upload 5GB of data that is counted as 15GB.

ANT Acceptable Use Policy

The Ant Acceptable Use Policy sets out the rules and guidelines relating to the use of your internet and telephone service. The Ant Acceptable Use Policy is available to our website <https://www.ant.com.au>

Excess Usage

Plans are shaped, so there are no surprise charges. "Shaped" means that speeds will be reduced to 128/128kbps when your data allowance in any month has been reached. You can continue to use your service while shaped but you should restrict this to emails, banking and general web browsing, because once you use a further 10% of your plans data allowance you will be further shaped to 64/64kbps. "peak" and "off-peak" data allowances are counted and shaped individually.

In addition to ANT's shaping policies nbn™ under its Fair Use Policy (FUP) have placed restrictions on the Sky Muster™ Satellite.

The following constitutes a breach of nbn™ Sky Muster™ Satellite Fair Use Policy network.

1. Customers can not use more than 150GB of total data in any rolling 4 week period. If your total usage (both Peak and Off Peak) exceeds 150GB in any rolling 4 week period, the service will be suspended until the start of your next anniversary date.
2. nbn™ mandates that Retail Service Providers must not exceed an average download amount per customer of 30GB across their customer base in a rolling 4 week period.

Additionally if you have breached **nbn**TM Sky MusterTM Fair Use Policy, **nbn**TM may impose further service reductions to your internet service. Datatop ups are not available on Education Ports.

Your maximum throughput will be lower than the given Peak Information Rate for your Plan and can be affected by: Overheads imposed by Ethernet and other protocols you use such as TCP/IP, the Internet server you are accessing, the network between ANT and the server you are accessing, the network between ANT and your service, and local factors such as the performance of your computer equipment including your network router and wireless network.

Speed Tier changes can be requested and will be implemented at your next anniversary date and incur a \$20.00 service charge Your data is reset on your Anniversary date. Any unused data allowance expires at anniversary date.

Information about Pricing

Services require a valid direct bank debit or credit card authority. Subscriptions are payable 1 month in advance via valid direct Bank Debit or Credit card, or Subscription fees can be paid 6 months in advance via, Electronic Funds Transfer, direct Bank Debit or Credit Card, cheque or money order. Subscription fees are deducted on your Anniversary date each month. The first and last months are billed on a pro rata basis.
