

Critical Information Summary

NBN Fibre

Information About the Service

NBN Fibre is part of the National Broadband Network internet service which uses the NBN Optical Fibre Access Network to deliver internet connection to your premises.

Mandatory Requirements and Availability

This service is not dependent on any bundling of services.

The NBN Fibre service is only available within an NBN Fibre service area. You can check availability on [NBN Co - National Broadband Network - Australia | NBN rollout map](#).

If your premises is in a NBN Fibre service area but is not already connected to the NBN, the installation will include running a fibre-optic cable from the street to a small box on the outside of your house (the Premises Connection Device).

The installer will then drill a small hole through your wall and feed the cable through into a wall plate that will be installed inside the house. A cable runs from there to the Network Termination Device, which looks like a broadband modem. There will also be a separate power supply box.

Minimum Term

Casual Connection - One month

Payment In Advance - 6 months

24 months – 24 months

Inclusion, exclusions and important conditions, limitations, restrictions or qualifications.

NBN Co supplies: Premises Connection Device, Fibre Wall Outlet, Network Termination Device and Power Supply Unit; first battery; external cabling from the street network to the Premises Connection Device; and internal cabling up to the Network Termination Device. This equipment remains the property of NBN Co. NBN Co.'s boundary of responsibility stops at the data (UNI-D) / voice (UNI-V) port.

The Network Terminating Device provides one Ethernet connection per subscribed internet service. If you wish to have Wi-Fi coverage to share the internet connection around the premises you will require an NBN ready Wireless Router.

To gain the full benefit of the NBN Fibre speeds you should have an NBN ready router ANT Communications can supply you with the NBN ready 4 port router included free of charge on our 24month contract (or, at an additional cost of \$105.00 including postage on the casual or prepaid 6 month plans) or , you can provide your own NBN ready router.

Plans are based on the NBN peak speed of your chosen plan. Speed for customers will be dependent on location, signal strength, volume of traffic through the NBN network, your equipment, software and download source.

ANT Anytime Plan data may be used at any time of the day you wish. At ANT there is none of the data restrictive “peak” or “off-peak” or “bonus data” time restrictions.

Data usage is counted in both directions so if you download 10GB of data and upload 10GB of data that is counted as 20GB. You can change your NBN Fibre plan up or down at any time. Plan Changes will be implemented at your next anniversary date. There is no charge for data allowance changes on the same speed. If you wish to change speed there is a \$20.00 fee.

Your data is reset on the anniversary date. Any unused data allowance expires at anniversary reset date.
